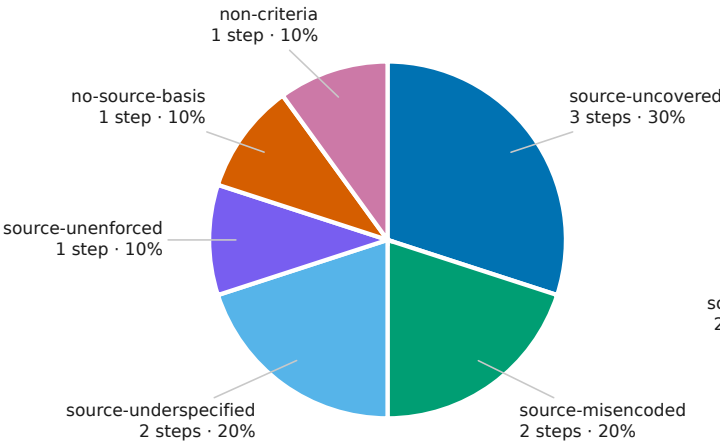
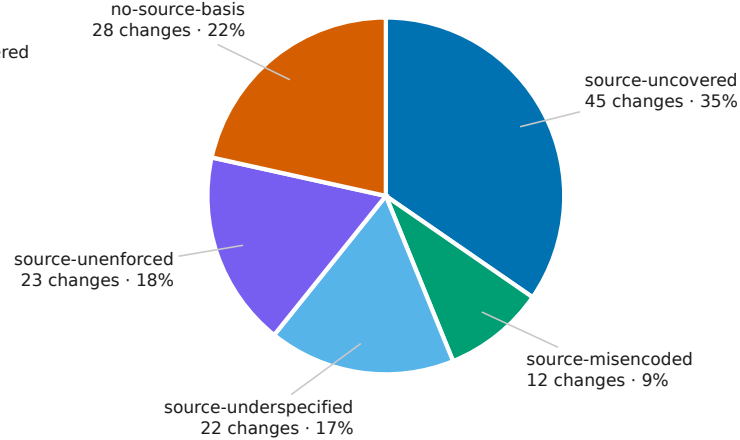
What kind of criteria change produced each reported configuration

By revision
(each tier step counts once)



8 of 10 track the source paper

By individual criterion
(each added/removed/reworded line)



102 of 130 track the source paper

Canonical family, nine projects. Only transitions on the path to the run registered as `best`. vbm_of_ptsd contributes none — its best IS its first transcription, never revised.
